Experience

2018 - Present
Front End Developer | Advanced Info Service PLC.
Working as a Front End Developer. I created a variety of websites for organizations in the telecommunications industry using HTML, CSS, Sass, JavaScript, and Adobe AEM as CMS. I contributed to the company's developer experience by implementing tools and technologies to improve our development process. And contributed with my team to improve UX/UI design to increase the efficiency of the customer journey. In addition, website optimization and Programmatic Advertising Platforms such as Cloudflare worker, Adobe DTM, Adobe Analytics, Adnuntius, Relay42, and Cxense.

2017 - 2018
Web Developer & Public Relations | North Bangkok University
As a Web Developer & Public Relations. I contributed to the development of the university website. Including university data management system, Alumni website, and database management system, Online sales tracking system and summarized as a report using HTML, CSS, JavaScript, PHP, SQL plus modern libraries and frameworks. And also to work on the production of advertising media such as motion graphics, Banners, Google Ads, Social media Ads to boost online sales and increase university website traffic.

2016 - 2017
Software Technician | ICOM TECH CO.,LTD
My primary responsibility as a Software Technician was to support and advise clients. In terms of software applications as well as problem-solving. This includes software installation and client training. In addition, technical and manual preparation support and consultation to the sales team.
